

C-1290 Triple Braked Drum Stand

A uniquely versatile tool. A single operator can independently control the tension of all three conductors. Ideally suited to the needs of cost conscious installation crews who require fast turnarounds and maximum productivity. Supplied with a full set of detachable stabilisers to maximise trailer stability during tensioning. Fitted with smooth operating disk brake for conductor control.

Advantages:

- Low centre of gravity
- Off set drums to enhance stability during towing
- Independent disc braking of each drum
- Standard drum drive pin location
- Convenient storage area for stabilisers (located in base frame)

SPECIFICATION

Drum Stand

Length: 4750mm
Width: 1800mm (without stabilisers)
Height: 1650mm (without drums or stabilisers)
Weight: 1025kg

Drum

Max Diameter: 1200mm
Max Width: 830mm
Braking Capacity: 60kgm
Drum Hole: 65 or 80mm (specify)
Drum Weight (Max): 640kg
