

Fibre Small Tray - FST

The Fibre Small Tray is a compact cap-ended ready access closure used for the organisation and protection of fibre cable splices in aerial, underground and directly buried installations.

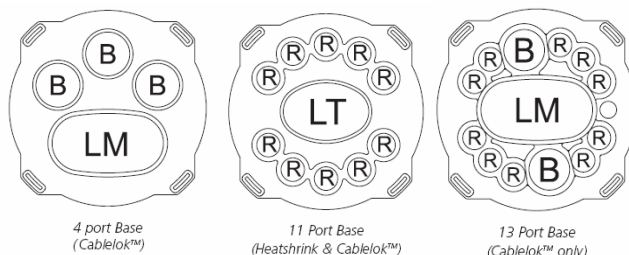

The unit is available with 3 base configurations having 3, 10 or 12 round cable ports and an oval port for loop through applications. The closure cover is sealed to the base using a rolling O ring, whilst the cables are sealed using either heatshrink or Cablelok™ depending on the base configuration selected.

Each base configuration is supplied with small fibre splice trays. Up to 3 trays can be used. 2 Trays are mounted back to back; the 3rd tray is mounted on a flexible hinge for easy access. The closure may also be supplied with a fixed small tray and a fibre storage basket for loop through applications.

- Maximum 36 fibre capacity using standard heatshrink splice protectors.
- Small trays giving compact size closures.
- Base to cover clamp with quick release Snapperband™ or stainless steel latch clamp.
- Cablelok™ Closures can be supplied with a variety of Cablelok™ sizes to suit the base configuration.
- Heatshrink kits are supplied with 1 sleeve and branch clip for the oval port, and 2 sleeves for the B ports.
- Supplied with cable surface preparation, management and identification materials.
- Other options and spur cable sealing kits available on request.
- Typical applications include splicing low fibre count distribution cables in fibre to the home (FTTH), fibre to the kerb (FTTK) and CATV.

Length: 310mm
Diameter: 110mm

Port Type	Cable Range / mm	
	CableLok™	Heatshrink
LM	2 x 9.5 - 22.0	2 x 8.0 - 22.0
LT	N/A	2 x 8.0 - 15.0
B	4.8 - 16.5	6.0 - 19.0
R	1.7 - 9.5	N/A
