

Hydraulic Press IR P 100

The hydraulic Press of 100 tons is the best press on the market in terms of lightness. Made of high tensile alloy steel it is hot forged and suitable for compression of joints on conductor and steel ropes for electric lines (medium and high voltage). Excellent weight/power ratio (3.1 ton/kg), easy to operate on suspension working platforms and steel towers. Maximum hexagonal key of 57 mm. It is fitted with a control valve, pressure gauge and quick release couplings.

SPECIFICATION

Max pressing force	100 tons (recommended working pressure 700 bar)
Press Weight	32 kg
Weight/Power ratio	3.1 Ton/kg
Die Weight	1.5 kg
Max. hexagon	57 mm
Max. stroke	26 mm
Case Dimensions	47 x 34 x 40 cm

ORDERING DETAILS

Product No	Description
G-IRP-P1001F-F	100 Ton Hyd Press
G-IRP-P100STAC-F	Die for Steel compression
G-IRP-P100STAL-F	Die for Al compression
