

Cordless Power Duct Slitter

The cordless power duct slitter eliminates the need for manual intervention during the trimming and slitting of innderduct utility conduit. Because it is cordless, there is no cable to get tangled up in, and its portability allows it to be used anywhere on site.

The power slitter features a blade diameter of 85mm and is adjustable to cut duct 25.4 - 50.8mm wall thickness. The unit is made with a durable, high impact, shock resistant casing that will withstand extreme temp erature and moisture. The compact design is easily manoeuvrable and fits comfortably in the hand.

The power slitter comes complete with 9.6v rechargeable battery and battery charger. The battery charges to full capacity in 1 hour and can last for up to 12.5 watt hours. Spare batteries are available on request.
